Café Collection, our signature same-day range
of quality café, delicatessen and
bakery packaging has been
extended with the
new Elegance line.
This follows 2013's
successful launch of
Slate Grey.
By popular request, new
products have been added
to our authentic and natural-looking
Kraft offering.

Consisting of a paperboard tray and rPET plastic lid, and available in three sizes, the Vizione® range is suitable for a wide range of occasions and uses, accommodating single and dual portions, holding large products or catering for party and family needs.

Due to its versatility, stackability and optimum product visibility the range can be used to display bakery products in a cross section of outlets from traditional bakeries through to large supermarket chains.

Patent Applied For.

combination packaging

| combination packaging | combination packaging |

Combination Packaging - fusing two materials to offer a range of innovative and outstanding products for the foodservice and convenience markets. We source environmentally-friendly plastic to complement our paperboard bases.

The **fuzone** range, with its unique 'snap-lok' system, provides increased food visibility, good stacking and merchandising capabilities, strong branding options as well as extended shelf-life.

We now offer a wider range with additional trays of varying depths and materials to fit the existing clear lids.

| combination packaging | combination packaging |

| machinery | machinery | machinery | machinery | machinery |

the range of machinery has been designed specifically with food packaging in mind, leveraging the company's vast expertise in this field, and complements our range of sandwich, tortilla, baguette and salad packaging.

The range starts with small counter-top machines that are perfect for the back of sandwich shops and delicatessens, then moves to various production models for larger sandwich and food-on-the-go producers.

ColMAP™ food that looks better for longer

| modified atmosphere packaging | modified atmosphere packaging |

Modified Atmosphere Packaging, or M.A.P., is a technology that has been developed to extend the shelf life of fresh food products. It works by substituting the atmospheric air inside a pack with a protective gas mix, which helps ensure that the food products stay and look fresh for longer.

The ColMAP™ paperboard packs are available in sandwich pack and tray formats and supplied alongside an innovative range of machinery for both entry and big volume producers.

| modified atmosphere packaging | modified atmosphere packaging |

ColMAP™ gas flushable paperboard packs

| modified atmosphere packaging | modified atmosphere packaging |

ColMAP™

offers many benefits to the foodservice market,:

- Extended shelf-life
- Less food wastage
- Better presentation
- Reduction in food related health hazards
- More flexible stock control
- Printable packs with your branding
- More eco-friendly than comparable all-plastic packs
- Particularly suited for countries with hot climates
